

Server and Container Replication Technology

# Cloud Migration and Disaster Recovery Solutions for all Servers and Containers

Making data and applications mobile and secure

RackWare provides a fully integrated solution for all your Assessment, Cloud Migration, Disaster Recovery & Backup needs. The solution is Hypervisor, Cloud and Application agnostic, allowing Migration and Protection of any Windows, Linux, Kubernetes and OpenShift system from any Datacenter into any cloud, and from any cloud to any other cloud. Cross-Platform container transformations such as Kubernetes to OpenShift and vice-versa are also supported.

### Key aspects of the RackWare product include:

- **RackWare Assess:** Fully automated evaluation of your IT resources:
  - ❖ Determine all OS and Container types
  - ❖ Complete inventory of compute, memory and storage
  - ❖ Monitoring to determine over and under provisioned resources
  - ❖ Right-sizing recommendations
  - ❖ Application affinities to aid wave planning

*\*Result - All the necessary data to plan a Cloud Migration\**
- **RackWare CloudMotion:** Secure, non-disruptive replication of servers (physical and virtual) and containers.
  - ❖ Simple set-up
  - ❖ Simple uniform workflow for all Migration operations
  - ❖ Application Agnostic
  - ❖ Container transformations (e.g., Kubernetes <-> OpenShift)
  - ❖ Non-disruptive to Source
  - ❖ Any Source to Any Target
  - ❖ Ultra-efficient Delta Syncs for minimal cutover times
- **RackWare CloudProtect:** A converged Disaster Recovery and Backup solution:
  - ❖ Full server and container restoration to any cloud
  - ❖ Single-File-Restore
  - ❖ Industry leading RPO and RTO times
  - ❖ Non-disruptive testing in DR target
  - ❖ Failover and Fallback from any cloud to any other cloud
  - ❖ Ransomware recovery
  - ❖ Auditable reporting

## About RackWare

RackWare makes data and applications mobile and secure. We empower our customers to run their applications and store their data in any cloud of their choice. Seamless mobility allows our customers to take advantage of cutting-edge services or reduced costs as they become available throughout the cloud universe. And if disaster strikes, whether that be of the natural or cyber-criminality type, our proprietary replication and sync technology has our customers protected.
